

# YULDASHEV GIYOSIDIN

## PROFESSIONAL SUMMARY

I've been studying in the field of IT for 2 years. And I am trying to do my best to become a good specialist. Since I have a great interest in IT, I have good ideas for a greater contribution to the development of this field. At the moment I already have knowledges in how to create website, designs for the site and also write codes for the site. Moreover, I created a web-site and mobile app design, using the Figma. These are my achievements. But I do intend to do my best to achieve even greater results in my work and will purposefully move towards my goal. Hopefully I will achieve success in my career.
